

Wound Analysis Report - Clinician Version

Analysis Date: 2025-09-21 12:23:13
Source Image: wound2.jpg
Model Used: SIMCLR U-Net

Quantitative Analysis:

Parameter	Value	Units	Notes
Wound Area	10.28	mm ²	Calculated from segmentation mask
Perimeter	13.57	mm	Wound boundary length
Condition Assessment	Medium wound - stable		AI-determined status
Healing Potential	Fair		Predicted healing trajectory
Severity Classification	Moderate		Clinical severity level
Confidence Score	0.85		Model confidence in analysis

Clinical Recommendations:

Maintain current treatment plan. Regular monitoring recommended. Assess for any signs of deterioration.

Technical Details:

- Segmentation Model: SIMCLR U-Net
- Image Processing: 128x128 normalization
- Scale Factor: 0.1 mm/pixel
- Analysis Timestamp: 20250921_122313
