

Wound Analysis Report - Clinician Version

Analysis Date: 2025-09-21 17:43:19
Source Image: ww3.jpg
Model Used: SIMCLR U-Net

Quantitative Analysis:

Parameter	Value	Units	Notes
Wound Area	1.84	mm ²	Calculated from segmentation mask
Perimeter	5.65	mm	Wound boundary length
Condition Assessment	Small wound - healing well		AI-determined status
Healing Potential	Good		Predicted healing trajectory
Severity Classification	Mild		Clinical severity level
Confidence Score	0.85		Model confidence in analysis

Clinical Recommendations:

Continue current treatment protocol. Monitor for any changes. Consider reducing frequency of assessments.

Technical Details:

- Segmentation Model: SIMCLR U-Net
- Image Processing: 128x128 normalization
- Scale Factor: 0.1 mm/pixel
- Analysis Timestamp: 20250921_174318
